

BWEP Dispatch #P002E

Recommended Vehicle: Helicopter or Search Plane
Scenery Needed: ORBX SAK

Nature of Problem:

Workman has fallen off an access ladder while installing a rotating vent on the roof of a pump house. This is in Section 1, and local services give a way point of "P002W" that should be put into your GPS. Start at Thompson Pass (K55). Fly 121* (SW) for about 3 miles ... easier to follow the pipeline. The pump house is on top of the farthest ridge, watch for the orange smoke. If fixed wing, land on the access road near the pipeline, there is a helipad available at this pump house.

Starting Location: Thompson Pass (K55)

Special Instructions: Pick up injured worker and return to Valdez. Park at the BWEP facility where medical personnel are awaiting your arrival..
