

## RTMM MedEvac Dispatch #E047B

Recommended Vehicle: Helicopter or Search Plane

Scenery Needed: ORBX PFJ

### Nature of Emergency:

- This is a search and rescue. A Piper Cub with two passengers aboard is missing on a flight from Ketchikan to Stewart. The pilot was using a hand-held GPS and radioed he was following a course from Mountain Point directly to Stewart CZST and would be at about 5000 feet. Controller Logs show the pilot checked in at 2:11 pm over Mountain Point stating his direct route to CZST. He was lost (normal) in ground clutter on the flight-following radar. At 2:49 pm there was a short burst mayday, then no other communications. The Cub travels at 75 mph. Find the cub, rescue and return to M031 or report position and status of the downed aircraft.

**Starting Location:** PAKT Ketchikan

### Location of Emergency:

- 38 minutes at 75 mph along a direct course between Mtn. Point and Stewart CZST.

### Medical Destination and Way Points:

- Heli:** M031 **Wheeled:** M031

### Special Instructions:

- Helicopter:** Depending on the crash location, you may be able to land nearby
- Float Plane:** Report position of downed aircraft, land on water to rescue if water is available.
- Wheeled:** Report position of downed aircraft, land if there is a nearby flat landing zone.
