Big Fall Hydro

Return to Misty Moorings
by Doug Linn

Welcome to the "Big Fall Hydro" scenery location for Return to Misty Moorings. The Big Lake Hydro complex is located on the Ecstall River (an offshoot of the Skeena near it's outfall to the sea). On a bearing of 105 from Prince Rupert, you will find this complex about 30 miles distant.

The package consists of a hydro plant on Big Fall Lake that actually supplies energy for this area. There is a beautiful waterfall (Big Fall) and at the base, a Brad's Bait & BBQ. Across from Brad's in this same cove is a little cabin where you can sit by the fire on a bench and marvel at the beautiful waterfall and cove.

This location replicates an actual location in the area. Here is a picture of the "Big Fall":

We are sure (sort of) that the building to the lower left is the Brad's Bait & BBQ.

Here's our rendition of this beautiful spot:

The Power Plant is above the dam (falls) on the port side of the lake as you are approaching it. The entire complex is lit up at night and you will see street lights on the road coming from the Power Plant down to Brad's.

Power Station

Here is the flight plan to get to the area:

Big Fall Hydro

And the Big Fall Cove Cabin:

Big Fall Cove Cabin

This is accessible for boaters, helicopters and float planes. There is a heli pad at the Power Plant on the roof, with a little building nearby that houses the stairway to get down into the plant. There is also a floating pad at Brad's Bait & BBQ. The mooring points are as follows:

Big Fall Hydro Plant: N53 59.67   W129 43.59   Mag 053
Brad's Bait & BBQ Big Fall: N53 59.01   W129 44.24   Mag 026
Big Fall Cove Cabin: N53 59.00   W129 44.39   Mag 086

Installation Instructions:

Add the folder "Big Fall Hydro" where you usually put your ADDON scenery for Return to Misty Moorings. Go into FSX, use "settings" and "add area".
